Inmate Trust Accounting

When creating a new booking each inmate will have a trust account opened for that booking. At the time of booking the new trust account balance will include any balances from previous incarceration and any automatic charges configured during the implementation project. During the incarceration all deposits, charges and checks written are updated to the inmates Trust Account. Upon release remaining balances are updated to an AR ledger with the inmates Person ID#. After release all charges and checks are updated to the inmate's AR Ledger. The user has to be authorized in order to make a deposit to a released inmate's AR Ledger.

Facility Financials and Reporting are supported with an interface to Peachtree accounting. All inmate transactions are interfaced with the complete accounting package.
