

## Trusty Camp Module

Trusty camp is for inmates who qualify to participate in various activities such as working in the kitchen, laundry, garage, cleaning, or general labor. These regimented rehabilitation programs are for those inmates who have been medically cleared, have no open charges or holds, and must be housed in maximum security.

There are three parts to this process. *First*, the inmate must be accepted to a trusty camp program. *Next*, the work assignments are created and assigned. *Finally*, the work detail is managed to monitor and track each time the inmate is moved or transferred. This process will track the “to and from” moves that occur during each trusty camp assignment. The ‘Trusty Camp’ module provides functions to:

- Assign an inmate to a trusty camp.
- View an inmate’s trusty camp status.
- Select required forms.
- View current work assignments, skills, bookings, and property.
- Assign and create work assignments.
- Perform and track group moves for work detail assignments.
